

Semi-Automatic Product Strap Banding Machine

Models: RGW560II & RGW560IIS

RGW560II Series - Adding value to your product with sleek, flexible and tamper-resistant graphic banding labels.

The RGW560II is a new concept in food presentation that showcases product while providing information and secure packaging.

Quick and easy to use, our DIGI Banding Machines can improve packing efficiency, food security and consumer appeal. They can also be programmed to enable compliance with Australian food labelling regulations.

If you require a weigh labelling option, the RGW560IIS model includes a trade approved DIGI Scale with 15 kg weighing capacity.

Eye-Catching Product Presentation

This stunning labelling style enables you to showcase product while providing all the information your customers require when making their purchasing decision.

The banding label's sophisticated graphic design printing allows customers a better view of the product and may increase their confidence in product selection and you can position the banding to maximise impact and security.

Other labelling techniques may limit the view of product and therefore reduce product appeal.

Banding is available in white, silver and clear for even greater control on how much of your product is seen.

Secure, Tamper-Resistant Packaging

The banding label uses a built-in heat seal to safely secure the package which; reduces chance of lids opening unexpectedly, deters and indicates deliberate tampering and eliminates the need to manually apply tape that may also compromise the visual appeal.

Additional POP / Barcode Labels

Add extra appeal to printed bands with the built-in POP Labeller that enables application of additional labels as part of the banding process.

Additional POP Labels are a convenient and efficient way to add your logo and colour for increased interest, brand awareness and instant appeal.

Flexible Informative Printing

Print images, product data and advertising messages in one pass and on just one band.

The RGW560II series enables flexible design for printing variable data on demand by thermal transfer method. The banding label provides considerable real estate to fit a wide variety of advertising messages or multiple lines of product information including; ingredients, storage instructions, "packed on and use by" dates and price. Weight information can be printed if using the scale model RGW560IIS.

Powered by DIGI 5600II intelligence means PLUs can be programmed to comply with relevant food labelling requirements including Plain English Allergen Labelling (PEAL).

GLUTEN FREE

High Performance Banding Material

Especially developed for DIGI RGW-560II Banding Machines, our BOPP film is heat-sealable on both sides and offers; very high seal strength, excellent water vapour barrier, exceptional puncture and impact resistance even at low temperatures, and superior optical properties.

Available in clear, white and silver.

Exceptional Connectivity & Usability

RGW560II Banding Machines use the DIGI 5600II series console to enable communication with other backroom wrapping machines or printers. The easy and familiar operation will help improve efficiency.

Model : RGW560II Series

FEATURES OVERVIEW

- flexible on-demand thermal transfer printing
- legal for trade use scale (Model # RGW560IIS only)
- banding labels use a heat seal to secure the package
- up to 12 packs per minute (speed varies depending on length of the band format)
- banding label has ample space to fit a wide variety of advertising images or multiple lines of product information
- flexible product strap eliminates the need for distracting labels allowing for better package design and visibility of pack contents
- 10.4" touch screen LCD display
- built-in POP label applicator is an efficient way to apply additional labels with images and colour. Also used for barcode labels when using clear banding material.
- DIGI 5600II series console enables communication with other backroom wrapping machines and printers
- PLUs can be programmed to conform to food labelling requirements such as PEAL

RGW560IIS Scale Model

SPECIFICATIONS

MODEL:	RGW560II (Without Scale)	RGW560IIS (with Scale)
Package size :	Width: 50 - 240 mm Depth: 80 mm or more Height: 10 - 150 mm	
Banding speed:	up to 12 packs per minute (speed varies depending on length of the band format)	
Banding film type:	OPP	
Printing method:	Thermal transfer	
Print resolution:	300 dpi	
Film width:	60 mm	
Printing area:	300 mm max. (Between 95 - 395 mm from top of binding label)	
Label size with additional POP / Barcode Labeller:	Width: 33 - 53 mm Height: 20 - 40 mm	
Display:	TFT LCD colour (10.4 inches) touch panel	
Operation:	Mechanical keys and touch panel	
Memory:	18 GB	
Power requirement:	Single phase 240 V	
Banding machine dimensions (mm)	630 (W) x 325 (D) x 788 (H)	
Scale weighing capacity:	N/A	6 / 15 kg x 2 / 5 g (multi-interval)
Scale dimensions (mm):	N/A	342 (W) x 285 (D) x 85 (H)
Net weight:	Approx 41.4 kg	Approx 45.2 kg
