

Check Weighing Scale Management Software

Model: GISCALEPRO

GISCALE PRO is a check weighing data management application for use with GI410 production check weighing scales. The application records weight data from scales on the production floor in real time and allows users to send data on both products and operators to the scales.

- Manage multiple production lines or individual scales from a central location.
- Products can be assigned to a group of scales (lines) or to individual scales. GISCALE PRO allows users full control over linked scales.
- Achieve objective and fair productivity assessments across all operators and products regardless of pack sizes or packing complexities by assigning products with an individual points weighting. For example 1 kg of strawberries may take twice as long to pack compared to a 250 g punnet. By assigning the 1 kg pack with 2 points per pack, and the 250 g punnet with 1 point per pack, productivity reports remain fair.
- Set required pack weight tolerances to help reduce give away and provide an accurate estimate of future give aways enabling better inventory planning, reduced inventory costs and enhanced quality control.
- Production reports can be generated for the current date or a specified date range.
- Optional modules allow for real time monitoring of production lines and operator productivity reporting.

Check Weighing Scale Management Software

PRODUCT CODE: GISCALEPRO

FEATURES

- Manage scale data from a back office computer
- Real time objective weight data recording provides transparency and objective insights for improved production line management
- Scales can be monitored as individual units or set up as part of a line
- Manage target weights and tares
- Audit trail to record software changes for traceability
- Optional operator productivity reporting
- Production reports can be generated for the current date or a specified date range
- Weight data captured includes
 - Product Name
 - Operator
 - Product code
 - Time and date
 - Gross weight
 - Package
 - Net weight
 - Scale Id
 - Tare weight

OPTIONS

- Real time module
- Statistics module
- Productivity module
- Additional GISCALE PC licence
